

# Delock Active Optical Cable USB 3.0-A male > USB 3.0-A female 50 m

## Description

This USB cable by Delock is used to connect USB devices, such as a webcam or a printer, to a PC or a laptop. This active optical cable is particularly thin and can transmit signals with virtually no loss over longer distances. The integrated Micro USB connector and the included Micro USB cable can supply additional power. The screws and bushings at the terminals ensure a secure connection.

## Note

- If the power is not sufficient, please also connect the included Micro USB cable to the computer.
- If you want to connect a hub, we recommend to use a device with a separate power supply.
- The plugs of the cable can get warm; please ensure adequate ventilation and do not cover the connectors.
- The integrated chipset conveys USB 2.0 and USB 1.1 signals to be transmitted via the USB 3.0 cable.

## Specification

- Connector:  
USB 3.0 Type-A male with screws + USB Type Micro-B female (for power supply) > USB 3.0 Type-A female with screw nuts
- Screw type: M2 x 0.4 6 g
- Data transfer rate up to 5 Gb/s
